

Bryn-y-Gwenin, Abergavenny

Overview:

Site Location:	>> Bryn-y-Gwenin
Client:	>> Welsh Water
Contract Value:	>> £750,000
Project Duration:	>> 6 months

This scheme was brought about due to increasing environmental concerns resulting from untreated foul water overflow from 57 dwellings at Brn-y-Gwennin.

The scheme involves supplying a main sewer with a pumping station to the village of Bryn-y-Gwenin. Dwellings in the village use septic tanks that overflow into open ditches in wet conditions.

5-kilometres of 150mm pipeline were laid at a depth of 1 - 3 metres part of which passes through a golf course, this resulted in understandable anxiety from club members concerning damage , however the surface and condition of the fairway was returned to its original condition.
