Contracting Coronavirus on-site Where the 2m distancing rule cannot be maintained	Site Managers Site Operatives	Risk of contracting Coronavirus resulting in illness and possible death	4	4	16	You should still advise staff to keep 2 metres apart as much as possible during the activity You should plan work to minimise contact between workers and avoid skin-to-skin and face-to-face contact. PPE must be clean and free of contamination. Where face-to-face contact is essential, this should be an absolute minimum. Face coverings are to be worn when working within 2m of another person and when sharing a vehicle. RPE is not advised when social distancing is maintained. Some PPE will be in short supply so must efforts must be maintained to look after is as it may need to be cleaned and re-used.	4	2	8

Contracting Coronavirus on-site Where the 2m distancing rule cannot be maintained	Site Managers Site Operatives	Risk of contracting Coronavirus resulting in illness and possible death	4	4	16	As soon as an activity can be carried out by a single person, then others must move away and maintain 2m distance between them. All contaminated PPE must be disposed of after the activity is completed. Hand must be washed with soap and water for a minimum of 20 seconds after activity is completed NB: this does not affect the task specific requirements for face mask use. E.g., where harmful respirable dusts are being created by site operations Refer to SOP rev 2 for details full control measures	4	2	8
