Lewis turns to Pendragon Contracts

13th November 2013

Lewis Civil Engineering Ltd, based in South Wales, is taking advantage of the cost benefits of Pendragon Contracts' reduced end-of-term damage (RED) contract hire solution by appointing the fleet management company as its preferred supplier of light commercial vehicles.

The company selected Pendragon Contracts, as the RED product eliminates unwanted end-of-contract refurbishment costs. This makes the total maintenance inclusive contract more transparent and cost effective over the 4 year term.

Mark Henson, fleet manager at Lewis Civil Engineering Ltd, says, "Pendragon Contracts made us aware of the advantages of its dedicated RED programme, which will ensure that at the end of the term we will not be hit by unforeseen and unwanted end-of-contract damage costs."

John Given, sales & marketing director for Pendragon Contracts, comments, "As part of our annual market survey, we listened to the comments of several hard working fleets regarding end-of-term refurbishment costs. We then developed our RED Contract Hire with maintenance product to enable fleet managers to remove expenditure in this area and deliver peace of mind at the end, as well as throughout the contract hire term."
